FEB 20 2014

Ms. Barbara Finazzo, Director  
Division of Environmental Planning & Protection  
U.S. Environmental Protection Agency, Region 2  
290 Broadway, 24<sup>th</sup> Floor  
New York, New York 10007-1866

Dear Ms. Finazzo:

Attached please find the 20<sup>th</sup> Annual Report for the State of New Jersey's assumed Freshwater Wetlands Program. This report covers the period from July 1, 2012 through June 30, 2013. The report was delayed in order for the Department to complete all data fields accurately.

If there are specific questions relating to the reports, please contact Jill Aspinwall of my staff at (609) 984-9736.

Sincerely,

Virginia Kopkash, Acting Director  
Division of Land Use Policy and Planning

Daniel Montello, EPA Region 2  
Dave Fanz, NJDEP, Land Use Management

**State of New Jersey  
Twentieth Annual Report to USEPA, Region II  
For a State-Assumed Freshwater Wetlands Regulatory Program  
(July 1, 2012-- June 30, 2013)**

The State of New Jersey, Department of Environmental Protection (Department) hereby submits this 20th annual report pursuant to the program reporting requirements of 40 CFR 233.52, and the State of New Jersey's Memorandum of Agreement (MOA), 40 CFR Part 233.13, with the Regional Administrator of the U.S. Environmental Protection Agency (USEPA), Region II. Please note that this report covers the time period from July 1, 2012 through the end of the State fiscal year, June 30, 2013, as required by the MOA.

**DATA SUMMARY**

Attached (**Appendix 1**) please find a database printout listing the pertinent regulatory program decisions rendered by the Department during the referenced review period. The data follows the same format as that provided in last year's report. This report provides data for applications that were decided within the reporting period.

As you recall, the Department's database tracks wetlands impacts in several categories, including "Wetlands filled (acres), Wetlands Excavated (acres), and Wetlands Cleared (acres)." Since the Federal Government only regulates wetland fill, the tables below only summarize acres of wetland filled, not acres cleared or excavated, however **Appendix 1** includes all three types of impacts. The database also provides the categories "Emergency permits, GPs and IPs; IP modification; and Open Water Fill. Finally, please keep in mind that general permit 10 is divided into multiple options. See Table 1 below. The data table below combines these for reporting purposes but the printout shows the separate categories for your information.

**Table 1**

General Permit Designation	Description of General Permit
10A-Very Minor Road Crossing	100 foot crossing & ¼ acre impact OR 1/8 acre and no length limit
10B-Minor Road Crossing	No alternative with lesser impact & ¼ acre impact

The Department completed processing of a total of 712 permit applications and made decisions as shown in the following chart.

Status of Permits from July 1, 2012 – June 30, 2013

	IPs and IP Mods.	GPs	Open Water Fill	Emergency Permits		Total
				GPs	IPs	
# Decisions	42	603	1	63	3	712
# Permits Approved	36	491	1	4	1	533
# Permits Denied	0	9	0	3	0	12
# Applications Withdrawn/ Cancelled	6	103	0	56	2	167

The following table contains an evaluation of the permit issuance data and the cumulative freshwater wetland fills resulting from the 533 freshwater wetland permits approved by the Department. The database printout is included as **Appendix 1**.

**ACREAGE OF WETLANDS FILLED RESULTING FROM PERMIT ISSUANCE BY  
DEPARTMENT**

**July 1, 2012 -- June 30, 2013**

Permit Type	# Permits Authorized	Acres Filled	Mitigation Required
GP#1	62	0.01	Not required
GP#2	45	0.38	Required for permanent impacts to 0.1 acres or greater. There was one permit with permanent impacts greater than 0.1 acres.
GP#3	1	0.0	Not required
GP#4	3	0.01	Required.
GP #5	0	0.00	Required except for wetlands that formed on top of landfill.

GP#6	38	7.02	Required for impacts to waters of the U.S. only. Required mitigation for 1.06 acres of fill in the form of on or off site mitigation project or monetary contribution.
GP#7	20	1.53	Not required
GP#8	26	0.00	Not required
GP#9	2	0.0	Not required
GP#10	92	1.83	Required for permanent impacts to 0.1 acres or greater. One permit required mitigation for 0.25 acres.
GP#11	63	0.59	Required for permanent impacts to 0.1 acres or greater.
GP#12	13	0.0	Not required
GP#13	7	0.2	Not required
GP#14	10	0.0	Not required
GP#15	0	0.0	Not required
GP#16	17	0	Not required. GP#16 authorizes the enhancement of wetlands and/or habitat
GP#17	8	0.49	Not required
GP#18	21	2.30	Not required
GP#19	6	0.0	Not required

GP#20	19	0.04	Not required
GP#21	16	0.11	Required for permanent impacts to 0.1 acres or greater.
GP#23	0	0.0	Not required
GP#24	0	0.0	Not required
GP#25	13	0.04	Not required
GP#26	7	0.0	Not required
GP#27	2	0.05	Not required

Totals	# Authorized	Acres Filled	Mitigation Required
Cumulative General Permits	491	14.6	See Table above
Emergency General Permits	4	0.04	Not required
Individual Wetland Permits	29	60.05	Required
Individual Wetland Permit Modifications	7	0.25	Required if modification authorizes additional wetland impacts
Individual Open Water Fill Permits	1	0.0	Required
Emergency Individual Permits	1	0.0	Required
Totals:	533	74.94	

### **NEW JERSEY PINELANDS COMMISSION**

Under a Memorandum of Agreement between the Department and the New Jersey Pinelands Commission, the Commission conducts regulatory review of activities involving

discharges of dredge or fill material within the Pinelands Area. Below is the freshwater wetland permit information for fiscal year 2013.

**FY 2013 Pinelands Area NJ Freshwater Wetlands General Permit Activity**

<b>General Permit Type</b>	<b>Number of Permits Issued</b>	<b>Acreage Impacted*</b>
GP #1	3	0.094
GP #10A	4	0.094
GP #10B	2	0.130
GP #18	2	0.406
<b>Total</b>	<b>11</b>	<b>0.724</b>

\* As discussed in last year's report, the Pinelands Commission does not distinguish between "wetlands cleared", "wetlands filled" and "wetlands excavated". Therefore the acres impacted include all three types of impacts.

**ENFORCEMENT**

The Bureau of Coastal and Land Use Compliance and Enforcement, responsible for enforcing the State's freshwater wetlands program, reports the following activity for fiscal year 2013:

Freshwater wetland incidents reported	464
Freshwater wetland investigations conducted	461
Number of freshwater wetland violation documents issued for complaint investigations	95
Freshwater wetland permits inspected for compliance	47
Freshwater wetland violation documents issued for permit compliance inspections	16
Freshwater wetland number of Administrative Order and Notice of Civil Administrative Penalty Assessments issued	3
Administrative Consent Orders executed	21
Freshwater Wetland Settlements	10
Freshwater wetland penalties assessed	\$92,000.00
Freshwater wetland penalties collected	\$921,132.00

**DISCUSSION OF PERMIT DATA**

For those General Permits (GP), under which authorizations during the review period resulted in greater than five (5) acres of cumulative impacts, a more detailed description and discussion, is provided below:

General Permit #6 –This GP allows impacts of up to one acre of wetlands and waters that are not part of a surface water tributary system, and not waters of the United States, as defined by the Federal government. In waters of the U.S., the permit is limited to ½ acre of wetland or open water fill. The GP cannot be used for wetlands of exceptional resource value or EPA Priority Wetlands.

Applicants are required to provide a site plan depicting proposed activities because the rules prohibit use of the permit solely for the purpose of eliminating a natural resource in order to avoid future regulation. However, it is still one of the most commonly issued GPs, since if the wetland/open water resource meets the non-surface water connection requirement, any type of development may be authorized. The Department considers connections such as storm water pipe systems to be a surface water connection and therefore ineligible for this general permit.

The Freshwater Wetland rules were amended to require mitigation for certain general permits received on or after November 2, 2009. General permit #6 now requires mitigation for permanent impacts to 0.1 acres or more of wetlands or waters that are also waters of the United States.

The Department approved 38 general permit #6 applications for a cumulative fill of 7.02 acres. Two of these permits required mitigation for a total of 1.06 acres because the wetlands filled were waters of the United States.

## **MITIGATION**

During this reporting period there were several permits issued that authorized permanent wetland impacts greater than 1.5 acres in size. These permits are listed below followed by a brief discussion of the chosen mitigation option for each:

**Permit #1221-06-0009.1** was an individual permit for the construction of a new section of Route 522 between Route 130 and Ridge Road (adjacent to the New Jersey Turnpike) in South Brunswick Township. The applicant received standard mitigation conditions requiring mitigation for the permanent disturbance of 2.320 acres of freshwater wetlands, specifically, 1.576 acres of forested wetlands, 0.69 acres of shrub/scrub wetlands, and 0.053 acres of herbaceous wetlands, through an on-site or off-site creation, restoration or enhancement project or with the purchase of credits from a mitigation bank serving the appropriate watershed management area (N.J.A.C. 7:7A-15 et seq).

**Permit #0000-09-0025.1** was an individual permit for the Garden State Parkway – Interchanges 83 to 100 Mainline Improvements. The offsite mitigation is located in Howell Township, Monmouth County. The Southard Road Mitigation Site will provide 9.27 acres of wetland enhancement at a 3:1 ratio, and 9.65 acres of riparian zone preservation at an 8:1 ratio, that will mitigate for 3.09 acres of wetland impacts, and 1.21 acres of riparian zone impacts. The offsite mitigation option was pursued because at the time the permit was approved, the site was not within the service area of an approved bank. Because the site provides a combination of wetland

and riparian mitigation, the Department deemed it ecologically valuable and approved its use for wetland mitigation.

**Permit 1810-10-0003.1** was a General permit 4 that authorized the disturbance of 2.57 acres of freshwater wetlands (the temporary disturbance of 1.92 acres of emergent and 0.65 of an acre of scrub/shrub wetlands) for the investigation and cleanup of hazardous materials under Freshwater Wetlands Statewide General Permit No. 4. The permittee will mitigate for the disturbance to these wetlands through an on-site restoration plan. The location of the project is the former GSA Belle Mead Depot in Hillsborough Township on Mountain View Road.

**Permit #0000-11-0001.2** was issued to the NJ Turnpike Authority for replacement of the existing southbound bridges carrying the Garden State Parkway over the Great Egg Harbor Bay and Drag Channel, replacement of the southbound causeway, construction of a 10-foot wide multi-use path along the entirety of the causeway, and construction of a parking lot located along U.S. Route 9, north of the Beesley's Point Bridge in the City of Somers Point. The permanent impacts for this permit were 3.88 acres of estuarine emergent coastal wetlands, 3.03 acres of tidal open waters and 4.25 acres of intertidal subtidal shallows. Mitigation was also required for the permanent impact to 0.20 acres of forested/scrub-shrub estuarine tidal high marsh and 0.83 acres of estuarine emergent tidal marsh outside the limits of the Promulgated Coastal Wetland Line of 1970 (which the Department regulates under the Freshwater Wetlands rules). In addition, 2:1 compensation for the loss of 0.505 acres of forested, 0.363 acres of herbaceous and 0.526 acres of maintained lawn riparian zone vegetation was required. Due to the extensive nature of the impacts, the Turnpike Authority consolidated mitigation of this impact with the mitigation for Permit #0506-06-0013.1 below.

**Permit #0506-06-0013.1** was issued to the NJ Turnpike Authority for improvements to interchanges 9, 10, and 11 of the Garden State Parkway in Cape May. It permitted permanent impacts to:

- 0.303 acres of forested coastal wetlands,
- 1.362 acres of estuarine emergent coastal wetlands;
- 0.011 acres of tidal open water/intertidal subtidal shallows;
- 3.666 acres of palustrine forested freshwater wetlands;
- 0.0518 acres of palustrine emergent freshwater wetlands;
- 0.394 acres of estuarine emergent tidal marsh outside the limits of the Promulgated Coastal Wetland Line of 1970; and
- 0.091 acres of State open waters.

It also permitted temporary impacts to 0.396 acres of estuarine emergent coastal wetlands and 0.040 acres of tidal open water/intertidal subtidal shallows.

The permanent impacts above include some temporary impacts that are greater than 6 months in duration so were regulated as permanent impacts.

The applicant purchased the "Old Turtle Thorofare" mitigation site that was approved as a mitigation bank before conflicts with Atlantic Electric prevented the bank's construction. In addition, there were some small onsite mitigation projects within the ROW of the Garden State Parkway as well as the purchase of 1.8 credits from the Stipson's Island Mitigation Bank to complete the mitigation package. The Army Corps was involved in approving the mitigation for this project.

**Permit #0000-09-0038.2/3** is for the Tennessee Gas Pipeline to install 10.85 total miles of new 30-inch diameter underground natural gas pipeline adjacent to an existing line, and a new 2.89 mile section of pipeline not paralleling the existing pipeline under the Delaware River and its back channel in Montague Township, Sussex County and to tie into the existing compressor station 325 in Wantage Township, Sussex County. In addition, the applicant proposes to widen 14 access roads without expanding or improving any culvert/crossings to access the construction site for the proposed 30-inch diameter pipeline. The permit authorized 12.13 acres of freshwater wetland impacts, 43.15 acres of transition area impacts, and 5.08 acres of state open water impacts, for the widening of access roads, 38 watercourse crossings, horizontal directional drill pad locations, pipeline installation, main-line valve sites, pig launching and receiving sites, additional staging areas, and associated clearing and grading. The Department required that all impacts be restored, except the permanently maintained right-of-way (ROW) totaling 55 feet on State owned lands and 75 feet on other lands within transition areas, riparian zones, and other uplands, 30 feet wide maintained within forested wetlands, and 10 feet maintained within herbaceous wetlands. Mitigation was approved for these impacts at the Pequest Mitigation Site in Allamuchy Township in Warren County. The site is 82.21 acres, and is currently agricultural. The Department approved 4.49 acres of enhancement with forested and scrub shrub wetland plantings, much of which is also within a stream corridor. The remainder of the site is being used to provide riparian zone compensation.

**Permit #1202-05-0005.2** was issued to Cranbury Development Corp. located in Cranbury Township, Middlesex County. The permit allows filling of 44 acres of freshwater forested wetlands for the removal of unexploded ordinance. Upon removal, the site is being capped to ensure that there is no remaining danger. Because the majority of the site is forested wetlands and uplands, the mitigation has been complicated. The Department is requiring a combination of creation (11.2 acres), enhancement (19.62 acres), restoration (2.8 acres) and preservation (202.54 acres) onsite for a total of 235.96 acres of mitigation. In addition, the permit requires the purchase of up to six mitigation credits from an appropriate Mitigation Bank. One credit was already purchased. The permit requires the applicant to purchase an additional five credits or alternatively to provide an offsite wetlands creation, restoration or enhancement proposal, preserve additional property, or contribute to mitigation projects identified by other state/federal agencies, non-government organizations, colleges or local municipalities within the watershed. Required mitigation was finalized in consultation with EPA.

#### Additional Mitigation Information

Because the Department sometimes authorizes permits with standard conditions requiring an acceptable mitigation proposal before the start of regulated activities, the Department's permitting data and mitigation data do not align. Some applicants delay the required submittal of a mitigation proposal until such time that they are ready to undertake their project. As a result, the reviews conducted by the Mitigation Unit frequently include the review of mitigation projects intended to satisfy approved permits that may have been included in previous reports to EPA and may not include reviews of mitigation for permits contained on the current annual report. Regardless, the Department, with the help of EPA grant funding has been improving its tracking system for mitigation so that the Department can report on its mitigation efforts.

During the reporting period, the Department's Mitigation Unit has been involved in 118 mitigation reviews. The largest impacts requiring mitigation continue to be those associated with the New Jersey Turnpike Authority's widening project. Also, like the previous reporting year, utility line projects undertaken by Transcontinental Gas, PSE&G, and Tennessee Gas also resulted in extensive wetland impacts, although many of them would not be considered impacts in accordance with Section 404 of the Clean Water Act because they involved extension vegetation removal and conversion of forested wetlands to emergent wetlands but involved only small discharges of dredge and fill material. In the cases where forested wetlands are not affected, the Department allows restoration on the site. Where forested wetlands are being permanently converted, the Department requires mitigation for the lost forest wetland component.

During the reporting period, the Mitigation Unit reviewed projects resulting in the following wetland impacts. As previously stated, the impact numbers will not align with the impacts reported for current permitting. Note: all numbers represent acres:

	Palustrine Emergent	Palustrine Scrub/Shrub	Palustrine Forested	State Open Water	Total
Excavated	9.89	2.13	2.39	1.84	16.25
Filled	35.28	34.66	35.06	7.39	112.39
Total	45.17	36.79	37.45	9.23	128.64

It is important to note that while the impacts have been recorded for all projects in the above table, reviewed by the Mitigation staff, if there was no plan included with the permit application, the applicant received a conditional approval requiring the applicant to provide a mitigation proposal. Therefore, there are no mitigation numbers to report until such time that a plan is received and approved.

The following summary tracks only mitigation for which plans have been approved and which are in various stages of completion. The "amount required" reflects the amount that the Department determined was necessary based upon the proposed mitigation method. For example, if an applicant proposes to do a restoration mitigation, then the amount required would reflect the Department's requirement to provide two acres for each one acre of impact; for enhancement anywhere from 3 to 10 times the area of impact; and for preservation, the amount required would reflect the Department's requirement to provide 27 acres for each acre of impact. The data for this time period is as follows:

Type of Wetlands to be Mitigated	Amount required (acres)	Amount Completed (acres)	Amount Pending (acres)
Palustrine Emergent	61.09	11.75	49.34
Palustrine Forested	69.93	271.19	--*
Palustrine Scrub Shrub	86.69	6.33	80.36
State Open Waters	8.38	5.60	2.78
Totals	226.09	294.87	132.48

\*Based upon the amount of forested wetlands proposed, we may achieve another 148.13 acres of forested wetlands when all projects from this period are completed.

### Mitigation Banks

The following mitigation banks received final or conceptual\* approval during the reporting period of July 1, 2012 through June 30, 2013:

<b>Bank</b>	<b>Location</b>	<b>Service Area</b>	<b>Acres in Bank</b>	<b>Number of Credits</b>
	<i>Twp./County</i>	<i>WMA</i>		
Barkers Brook	Springfield & Eastampton/Burlington	20	33.57	11.19
Marsh Bog Brook II	Howell/Monmouth	12	11.38	1.60
Mullica Bank*	Evesham Twp./Burlington the	To be determined		To be determined
<b>Troy Meadows Bank*</b>	<b>Parsippany-Troy Hills/ Morris County</b>	<b>To be determined</b>		<b>To be determined</b>

### In-Lieu Fee

The Freshwater Wetland Mitigation Council administers the State's in lieu fee program. During the reporting period, the Council made the following decisions:

1. Conceptually approved a proposal from North Jersey Resource Conservation and Development Council, to restore palustrine wetlands along Lopatcong Creek, located on Route 519, Greenwich and Lopatcong Townships in Warren County, New Jersey. The wetland restoration was estimated at 2.5 acres but the entire project is anticipated to cost \$1,136,436. Because there are also historical aspects to the project, the Council asked that the final proposal be more specific regarding the costs relating directly to the wetland aspects of the project.

2. Conceptually approved the donation of land to resolve an administrative consent order proceeding brought against Tilcon New York Inc. by the Department for the impact to 1.27 acres of freshwater wetlands on their quarry facility located in Bloomingdale Borough in Passaic County. The land donation is 34.3 acres of a 90-acre tract located within West Milford Township, Passaic County. Although the impact is within the service area of the Pio Costa bank, the administrative consent order including the land donation proposal was in place before the Pio Costa Bank was allowed to sell credits.

Finally, during the reporting period, the Council also accepted one monetary contribution from Essex County to satisfy the mitigation requirements for freshwater wetland individual permit # 0700-12-0001.1 for permanently disturbing 0.033 acres of forested freshwater wetlands and 0.043 acres of State open water for the improvements to South Orange Avenue in the

Township of Millburn, Maplewood and South Orange Village, Essex County, New Jersey. Although the impact was located within the service area of the Port Reading Bank, it was comprised of impacts to freshwater, forested wetlands for which the Port Reading Bank has no credits. Therefore, upon exhausting all other mitigation options, the Department permitted the applicant to prepare a monetary contribution in the amount of \$105,048 which was subsequently accepted by the Mitigation Council.

### Data

The Department is providing the following data reports upon which the mitigation provisions of this report were based:

1. A printout of all mitigation projects receiving either preliminary or final sign off during the reporting period. "Complete Mit. Sup. Review by Impacts" are all projects that have received conditions requiring the submittal of a mitigation proposal and projects for which a mitigation plan has been approved.
2. "Approve Mitigation Plan" projects are those for which a mitigation proposal has been provided and approved and which are now being tracked via the submittal of monitoring reports; and those which are completed in their entirety.

The key to the "Approve Mitigation Plan" is as follows:

"File number" is file number;

"Facility Name" is applicant name;

"Amount required" is the amount of mitigation required based upon the type of mitigation proposed. For example, if the proposed mitigation option is creation, the amount required will be twice the area of impact; if the proposed option is preservation, the amount required will be 27 times the area of impact; if the proposed option is credit purchase, the amount required will equal the wetland impact;

"Amount proposed" is the amount the applicant proposes to create, enhance, etc. in an approved mitigation plan;

"Amount completed" is the amount that has been field verified when the project has completed the 5-year monitoring period;

"Mitigation Information Method" is the type of mitigation that is being provided;

"Name of Bank" is the name of a bank in the service area that is used to satisfy the mitigation requirement.

3. A History of Council Approved Projects; and
4. A list of State and Federal/State combined mitigation banks with freshwater wetland credits.

All mitigation documentation is included as **Appendix 2**.

### OTHER INITIATIVES

This year marks the 25<sup>th</sup> anniversary of the enactment of the Freshwater Wetlands Protection Act (Act). It has been standard practice within the Division to track wetlands impacted through permits and report these metrics each year. However, there has never been a quantitative method to measure the positive impacts of the Act. The wetland impacts the Division authorizes only account for a fraction of the wetlands on a particular property. Likewise, many of our permits result in conservation restrictions that preserve wetlands in perpetuity. Our Department data base (NJEMS) has been modified to track these positive changes. Wetlands left undisturbed and/or preserved have also been identified as a performance metric of the Division that must be reported on a regular basis. We have been tracking freshwater data for exactly one year in NJEMS, so for FY 2013 which is July 2012 to June 2013, here are the numbers:

Freshwater Wetlands **preserved permanently** = 461 acres. These sites have conservation restrictions that include wetlands associated with approvals such as transition area averaging plans; and

Freshwater Wetlands **avoided** = 1031 acres (on development sites for which we have approved permits)

### **COORDINATION WITH OTHER AGENCIES**

As required pursuant to our assumption agreement, the Department coordinates with the State Historic Preservation Office (SHPO) (an agency located within the Department of Environmental Protection), the U.S. Fish and Wildlife Service, and your Agency.

#### **State Historic Preservation Office**

In accordance with our Memorandum of Understanding, the Department screens incoming applications for categories of activities that "may affect properties which are listed, or are eligible for listing, on the New Jersey or National Register of Historic Places" (See N.J.A.C. 7:7A-12.2(l)). However, in the October 2008 amendments to the rules, applicants are required to do a preliminary assessment of their projects and those proposing projects having a high probability of the presence of historic and archaeological resources, in accordance with the Department's criteria are required to submit a Phase IA historical and archaeological survey and an architectural survey with their initial application to the Department. This enables the Department to forward the application with the initial survey to SHPO for review and comment. A permit cannot be issued "unless the applicant demonstrates to the Department that the proposed activity avoids or minimizes impacts to the maximum extent practicable or the Department determines that any impact to the affected property would not impact the property's ability to continue to meet the criteria for listing ...or otherwise negatively impact the integrity of the property or the characteristics of the property that led to the determination of listing or eligibility." (See N.J.A.C. 7:7A-4.3(b)5) The State Historic Preservation Office completed a total of 206 reviews. A summary of these reviews is located in **Appendix 4**.

### **Endangered Species Issues**

The Department's review of permit applications under the FWPA includes a review for potential impacts to both Federal and State-listed threatened and endangered species. Based upon this review, 970 projects were reviewed and 43 field inspections were conducted. The product of this review was a total of 211 sites classified as wetlands of exceptional resource value\* due to the presence of state or federally listed species or associated habitat. Those related to federally listed species are:

9 sites for bog turtle (*Clemmys muhlenbergii*)

10 sites for Swamp pink (*Helonias bullata*)

7 sites for Beach amaranth

30 sites for Indiana bat (*Myotis sodalis*)

\*Designation of wetlands as exceptional resource value under the State program reflects the highest classification and affords such resources the greatest degree of protection under the Freshwater Wetlands Protection Act. Similarly, certain limitations and restrictions apply within and around such wetlands, and specific types of proposed activities -- which might otherwise qualify for authorization under applicable general permits -- cannot be authorized if proposed within wetlands of exceptional resource value or their associated transition area.

### **U.S. Fish and Wildlife Service**

As required pursuant to the Department's Memorandum of Understanding with the U.S. Fish and Wildlife Service, upon receipt, those applications for certain general permits in townships that have Federally-listed endangered or threatened species are sent to the U.S. Fish and Wildlife Service for review. The Service makes a finding of "no potential to affect" or "potential to affect" endangered or threatened species. For those with no potential to affect, the Department is free to complete processing of the application and approve or deny it as appropriate. For those with the potential to affect endangered or threatened species, as determined by the U.S. Fish and Wildlife Service, the Department works with the Service to satisfy their concerns by either working with the applicant to amend a project, attaching conditions to a permit, denying a permit or elevating the Service's concerns to EPA for consideration and resolution.

Since the Service began experiencing severe staffing reductions that made it more difficult for them to fulfill their mandate, the Department agreed to modify its coordination process with the Service by undertaking pre-screening of applications with the goal of narrowing the number of projects circulated to the Service to those with species onsite or within a specific vicinity. The Department prescreened 76 projects for potential impacts to Federally-listed threatened or endangered species. Of these, 24 were deemed by the Department to have a

potential to affect Federally-listed species and were therefore forwarded to the Service for review. The database printouts in **Appendix 3** show the results of the Service coordination on those applications that were completed during this timeframe. Please note that also included as **Appendix 3A** is a printout of the database kept by the Division of Land Use Regulation's Threatened and Endangered Species Unit of projects pre-screened by the unit during this reporting period.

#### **Status of wetland permitting in the Highlands Preservation Area**

The Highlands Water Protection and Planning Act (Highlands Act) (N.J.S.A. 13:20-1 et seq.) establishes more stringent permitting for a region in the northern portion of the State. As stated in our last report, the Highlands Act has modified the administration of the State's wetland program in the Preservation area of the Highlands region by making it more difficult to obtain permits for impacts to Highlands open waters, which include wetlands. The Highlands Act prohibits all but linear impacts to Highlands open waters. Further, by regulation, all wetland impacts in the Highlands preservation area require mitigation.

The Department issued Highlands Preservation Area Approvals for a total of 5 projects. One was a Highlands General Permit 1, two were a Highlands Preservation Area approval, and two were a Highlands Preservation Area approval with waiver. There were no wetlands filled in the Highlands Preservation Area during the reporting period. Data from permitting that occurred in the Highlands preservation area under the Highlands Act is presented in **Appendix 5**.

#### **OTHER SIGNIFICANT ISSUES**

In November of 2010, the Department established a rule team to evaluate the Department's four primary land use rules: Flood Hazard Area Control Act rules, Freshwater Wetland Protection Act rules, Coastal Permit Program rules and the rules on Coastal Zone Management, and to propose changes to these rules with the primary goal to make the procedural components of the three permitting programs as similar as possible. The Department is also proposing substantive changes to all of the rules.

The rule team conducted two stakeholder meetings on April 11, 2011 and April 29, 2011 to gather input from interested stakeholders on the proposed amendments to the Freshwater Wetland Protection Act rules. In attendance were representatives from the environmental community, the development community, consultants, federal agencies, other state agencies, municipalities, and Department staff. At this time, based on the rule team's review, and input gathered at the stakeholder meetings, the changes proposed to the Freshwater Wetland Protection Act rules are primarily administrative as discussed above. However some substantive changes are being considered such as amendments to some of the general permits in order to coordinate them with the Flood Hazard Area Control Act general permits. All amendments being considered will be discussed with EPA prior to proposal. As the State continues to recover and rebuild after Superstorm Sandy, these efforts continue to be on hold in order to focus on the Flood Hazard Area Control Act and the Coastal Zone Management Rules.

# APPENDIX 1

## Freshwater Wetland Permit Decisions

# Freshwater Wetlands Permit Decisions between 7/1/2012 and 6/30/2013
